

**Coal at Spitzbergen.**  
According to a recent report coal mining has been commenced on the west coast of Spitzbergen. The discovery of coal is one of the results achieved by the Swedish expedition sent out to study the geology of Spitzbergen. About 200 tons of coal were mined last summer, of which ninety tons were taken by a Spitzbergen whaling company.

You can praise an actress to the skies, but that doesn't make a star of her.

### Do You Want to Know What You Swallow?

There is a growing sentiment in this country in favor of medicines of known composition. It is but natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only add to the well-earned reputation of his medicines, Dr. R. V. Pierce, of Buffalo, N. Y., has "taken time by the forelock" as it were, and is publishing broadcast a list of all the ingredients entering into his leading medicines, the "Golden Medical Discovery," the popular liver invigorator, stomach tonic, blood purifier, and heart regulator; also of his "Favorite Prescription" for weak, overworked, broken-down, nervous and invalid women.

This bold and out-spoken movement on the part of Dr. Pierce, is showing exactly what his well-known medicines are composed of, completely dispelling all harmful critics who have heretofore unjustly attacked them. A little pamphlet has been compiled, from the standard medical authorities of all the several schools of practice, showing the strongest endorsements by leading medical writers of the several ingredients which enter into Dr. Pierce's medicines. A copy of this little book is mailed free to any one desiring to learn more concerning the valuable, native, medicinal plants which enter into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

Dr. Pierce's Pleasant Pellets are tiny, sugar-coated anti-bilious granules. They regulate and invigorate Stomach, Liver and Bowels. Do not hurt the "pill habit," but cure constipation. One of two each day for a laxative and regulator, three or four for active cathartic. Once tried always in favor. **50,000** GIVEN AWAY. In copies of Dr. Pierce's Common Sense Medical Adviser, a book that sold to the extent of 500,000 copies a few years ago, at \$1.50 per copy. Last year we gave away 50,000 copies of this invaluable book. This year we shall give away 50,000 more of them. Will you share in this benefit? If so, send only 21 one-cent stamps to cover cost of mailing only one book in stiff paper covers, or 31 stamps for cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

**Royalty and American Land.**  
The royal families of Sweden, Spain and Italy all own lots in New York. Kaiser Wilhelm owns several parcels of New York land and has been for some years a heavy investor in Western property. The King of England inherited from his mother a piece of real estate on Nassau street, in New York, King Edward owns some thousands of acres of Western land.

**Census of India.**  
According to the latest Indian census, that of 1901, the population of India was 294,361,056, and the total number of people employed in various capacities by the government was 1,480,276. Of these, 245,803 were partially agriculturists, and about as many more were employed in occupations not strictly official, thus leaving about a million who could be called government officials.

**Emperor William's Daughter.**  
The only daughter of the German emperor is the youngest of seven children. She is 13 years of age and is "tall, angular and pale." This young lady is called affectionately princess-schen by the people and is said to be the only one of the Kaiser's children who ever dares to take any liberties with the august head of the family. It is said that on one occasion the emperor said: "My daughter often forgets that I am German emperor, but she never forgets that she is princess royal."

**GRAND TO LIVE.**  
And the Last Laugh is Always the Best.

"Six months ago I would have laughed at the idea that there could be anything better for a table beverage than coffee," writes an Ohio woman—"now I laugh to know there is." "Since childhood I drank coffee as freely as any other member of the family. The result was a puny, sickly girl, and as I grew into womanhood I did not gain in health, but was afflicted with heart trouble, a weak and disordered stomach, wrecked nerves and a general breaking down, till last winter, at the age of 38 I seemed to be on the verge of consumption. My friends greeted me with 'How bad you look! What a terrible color!' and this was not very comforting.

"The doctors and patent medicines did me absolutely no good. I was thoroughly discouraged.

"Then I gave up coffee and commenced Postum Food Coffee. At first I didn't like it, but after a few trials and following the directions exactly, it was grand. It was refreshing and satisfying. In a couple of weeks I noticed a great change. I became stronger, my brain grew clearer, I was not troubled with forgetfulness as in coffee times, my power of endurance was more than doubled. The heart trouble and indigestion disappeared and my nerves became steady and strong.

"I began to take an interest in things about me. Housework and home-making became a pleasure. My friends have marveled at the change and when they inquire what brought it about, I answer 'Postum Food Coffee, and nothing else in the world.' Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville," in pgs.

## WITTE MAY RESIGN

IT IS ALLEGED HE HAD AN ATTACK OF HEART TROUBLE.

### THE COUNT MAY LEAVE RUSSIA.

Many Instances Are Cited of Terrorism of Local Officials in Preventing a Free Expression of the Peasants.

St. Petersburg, March 21.—In high circles the rumor was current that Count Witte had definitely decided to retire from the premiership. The Associated Press is unable to confirm the rumor, as Count Witte has retired and the chancellery was closed when the correspondent called shortly after midnight. From an absolutely authoritative source, however, it can be stated that Count Witte at a session of the council of the empire made a statement which is interpreted by many members of the council as a virtual declaration that career as premier is ended by him and that he will be succeeded by Privy Counsellor Kokovsov, former minister of finance.

A project for the solution of the Agrarian problem by the purchase of lands from the nobles and other large proprietors through the peasant banks and their re-sale to peasants on long term installment payments, was under discussion. As the treasury is in condition to advance the money to the banks for this purpose Count Witte advocated a scheme under which the banks should purchase the land with fifteen-year credit bonds, instead of cash. A very marked division of the cabinet developed. Finance Minister Shipoff opposed the premier. Suddenly M. Kokovsov arose and in a warm speech earnestly supported Count Witte's views. When he had concluded, Count Witte closed the debate in a few words, rather apologizing for his seeming indifference and thanking M. Kokovsov for his support, adding:

"I also might have adopted a better defense had I been as much interested in the future as Alexander Nikolaevitch," meaning M. Kokovsov, Russians, even on formal occasions, referring to persons by their Christian names.

On what is apparently reliable authority it is said that the condition of Count Witte's health is quite unsatisfactory. He is said to have experienced a rather alarming attack of heart trouble a few days ago. His physician advised him some time ago to give up work. It is known Count Witte believing that he had weathered the political storm, formed a determination to relinquish the premiership upon the meeting of the national assembly. Recently, however, the strength of the reactionaries increased, and the premier was obliged to keep up the fight against heavy odds. It may be that his endurance was thus exhausted and that, feeling that his health was declining, he has reached the decision to retire immediately.

As the elections proceed there is more and more evidence of the virtual exclusion from participation of the radical elements of the population. The preliminary stages of the elections will rob the national assembly of much of its national character. Its authority to speak will be absolutely denied by the prelatial organization which bore the brunt of the fight for liberty. Complaints of interference in the country districts are increasing. Many flagrant instances are cited of the terrorism of local officials in preventing a free expression of the peasants, and often of practically compelling the selection of priests and village elders. The seeming apathy of the small land-owners assemblies, at which an average of only ten per cent of the voters were present, is explained by the feeling that they were not free to choose.

Carefully collected information from the outlying industrial districts shows that the elections were a complete farce. Nominally eleven of the thirty-nine working groups entitled to participate elected twenty out of fifty-seven delegates to the convention which will select eighteen representatives for the city. The convention will in turn elect for St. Petersburg six members of the national assembly.

New York, March 21.—A rumor originated in Omaha, that Charles M. Schwab had senatorial aspirations and to attain this end had established a residence in Nevada and denied by him. "It is merely an idle rumor and there is not a word of truth in it."

**Labor Men in Session.**  
Washington, March 21.—In response to the call of President Samuel Gompers, the executive council of the American Federation of Labor began a several days' session here.

Yokohama, March 19.—Prince Arthur of Connaught, who came to Japan at the head of the special embassy from King Edward to the Emperor of Japan to convey to the latter the insignia of the Order of the Garter, sailed on board the steamer Empress of Japan for Canada.

### A WOMAN POLITICIAN.

That is the Part Being Played by an English Woman.

The considerable part which English women play in politics is well expressed by the London Mail in an article upon the death of Lady Gray, wife of Sir Edward Grey, secretary of state for foreign affairs. It said, in part: "Even apart from her devotion to her husband she was the keenest possible Liberal politician, though the daughter of an old Tory squire, Major S. F. Widdrington (whose ancestor is mentioned in the Ballad of Chevy Chase), and her personal popularity in the Border county was responsible for much of its liberalism. For Sir Edward, she worked incessantly and brilliantly, from his first political campaign, two months after his marriage in 1885, down to the late battle, from whose triumph she has been so tragically called away." Lady Gray had a large desk at Faldoun devoted to political papers, answered many of Sir Edward's letters, and throughout his five campaigns frequently took notes at his opponents' meetings of points in the speeches which she thought needed reply.

### HAD HEART PAINS.

A Critical Case of Rheumatism Cured By Dr. Williams' Pink Pills.

While Mr. W. S. Geisel, of No. 125 East Coates street, Moberly, Mo., was steadily working at his trade in a foundry at that place, he became the victim of an attack of rheumatism, and his experience is that of thousands who are compelled to work in similar surroundings. He describes his situation as follows:

"I had been at work for a long time in a foundry where I was exposed to dampness. First my feet began to hurt and to swell, then my knees and my shoulder joints began to be affected in the same way. Finally I could not walk without great difficulty and suffering and had to stop work altogether. My appetite was feeble and I grew very pale and weak. I began to have pains about my heart and it fluttered a great deal. I became greatly alarmed about my condition. My mother knew about the virtues of Dr. Williams' Pink Pills, as they had given her back her health when she was nearly wasting to death, and when she found that they were good for rheumatism too, she began to give them to me about a month after I was attacked. That was in the early part of March, 1903, and by June they had driven away the pains and swelling and had restored my appetite and color. Then I felt strong enough to take up a line of outdoor work and now, in October, I regard myself as entirely well and I am about to go into a foundry again at St. Louis."

Dr. Williams' Pink Pills also cure other diseases springing from impure blood or disordered nerves, such as sciatica, locomotor ataxia, partial paralysis and all forms of weakness in male or female. They may be had at all druggists or directly from the Dr. Williams' Medicine Company, Schenectady, N. Y.

It is the respectable appearance of most sinners that makes them dangerous.

If it wasn't for the cynic a fellow would never know how happy he isn't.

Smokers have to call for Lewis' Single Blinder cigar to get it. Your dealer or Lewis' Factory, Peoria, Ill.

### Stopping a Train.

A train traveling at the rate of sixty miles an hour can be brought to a standstill in 400 yards, at fifty-five miles an hour in 340 yards, fifty miles in 275, forty-five in 220, forty in 180, thirty-five in 135, and thirty in 100 yards.

### Specialty of Elopements.

Magistrate John Delanty, of Jeffersonville, Ind., announces that hereafter he will marry free of charge every alternate eloping couple. In view of the fact that Jeffersonville is the mecca of all the eloping couples in Southern Illinois, Kentucky, Indiana and part of Ohio, Delanty confidently expects to do a land office business in the matrimonial line. It is stated upon reliable authority that one Jeffersonville justice in the course of the last twenty-three years has married nearly 7,000 eloping couples.

### COULD NOT KEEP UP.

Broken Down, Like Many Another Woman, with Exhausting Kidney Troubles.

Mrs. A. Taylor, of Wharton, N. J., says: "I had kidney trouble in its most painful and severe form, and the torture I went through now seems to have been almost unbearable. I had backaches, pains in the side and joints, dizzy spells and hot, feverish headaches. There were bearing-down pains, and the kidney secretions passed too frequently and with a burning sensation. They showed sediment. I became discouraged, weak, languid and depressed, so sick and weak that I could not keep up. As doctors did not cure me I decided to try Doan's Kidney Pills, and with such success that my troubles were all gone after using eight boxes, and my strength, ambition and general health is fine."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Let a man have his own way about everything and anybody can get along with him.

**Many Children are Sickly.**  
Mother Gray's Sweet Powders for Children, used by Mother Gray, a nurse in Children's Home, New York, cure Feverishness, Headache, Stomach Troubles, Teething Disorders, Break up Colds and Destroy Worms. At all Druggists. 25c. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.

Trust magnate's motto: "Get and forget."

**Important to Mothers.**  
Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it

Bears the Signature of *Chas. H. Fletcher*. In Use For Over 30 Years. The Kind You Have Always Bought.

**Largest Coal Operator.**  
Baron Joicey, one of the new English peers, is the largest individual producer of coal in the world. The output of the Lampton and Joicey Companies, which he practically owns, amounts to 50,000,000 tons per annum, and he has besides large interests in several other coal companies.

**Reasoning of Animals.**  
In the unending controversy as to the reasoning powers of animals the weight of numbers inclines more and more against the eminent naturalists who hold with John Burroughs that instinct is nearly the sole guide, and reason plays an extremely small part.

**Cordite Diamonds.**  
By exploding cordite in closed steel cylinders Sir William Crookes has succeeded in producing certain eight-sided microscopic crystals which, so far as examined, resemble diamonds. If further experiments confirm this, a new method of diamond formation will have been discovered. Prof. Crookes estimates that the temperature and pressure attained inside the cylinders at the time of explosion were respectively 5,400 degrees absolute and about 120,000 pounds per square inch.
